SUNRISE WINDOWS ADDS BRAZILIAN PECAN TO COLOR CHOICES

TEMPERANCE, MI., Sept. 25 – Sunrise Windows has introduced another woodgrain to its line-up of interior color choices for its replacement vinyl windows. The new color is called Brazilian Pecan.

This new color is the 4th woodgrain the company offers to consumers, and brings the number of interior color choices to 6. Brazilian Pecan is currently available with a Painter's White exterior, which is the 16th color combination presented.

In a culture used to having many choices for a particular product, this Brazilian Pecan woodgrain will be a welcome addition for Sunrise Windows' customers, giving them the opportunity to show homeowners an extensive line of color options. "This is the color our customers most requested when we did a survey, and it's beautiful," says Gary Delman, president of Sunrise Windows. "It's a warm, medium-hued woodgrain that fits nicely between our Golden and Provincial Oaks."

Sunrise Windows, a 4-time Crystal Achievement Award winner, manufactures premium-performing vinyl replacement windows in 3 distinct lines. Each line includes double hungs, sliders, casements, bays, bows, sliding doors, garden windows, and specialty shapes. The company has twice won Most Innovative Window in the Crystal Achievement Awards.
