SUNRISE WINDOWS EXPANDS FACILITY

Over 50% Increase in Square Footage Necessary to Meet Growing Demand for Windows and to Add Capacity for New Sliding Patio Door

TEMPERANCE, MI., May 2002 - Sunrise Windows, Ltd., a manufacturer of custom-sized replacement windows, has recently completed a 36,000 square foot addition to their Temperance, Michigan manufacturing facility. As well as increasing manufacturing capacity, Sunrise will begin to manufacture a premium line of sliding patio doors.

“Our company continues to see growing demand for all of our products, and this expansion was necessary to not only meet that demand, but to also allow us to continue to improve every aspect of our company’s performance,” stated Gary Delman, President of Sunrise Windows. “We’ve been fortunate to experience rapid growth over the last few years, and it’s imperative that we reinvest in our business.”

At peak operating time, Sunrise normally employs approximately 175 people, and as the expansion is completed in terms of machinery and production lines, that number should increase to around 250.

“There are several factors that make our company unique,” said Mr. Delman. “Our product quality, our patented design, our consistent improvements and introductions of more options and products... but one of our largest assets is our dedication to customer relationships, no matter how small or large they are. We exist because of them, and if there is anything we can do to help them succeed or to ensure they are satisfied with us, we will do it.”

Sunrise Windows, Ltd., offers a very extensive line of high quality windows and sliding patio doors. Windows include double and single hung, horizontal and tilt-in sliding, bow and bay, casement, garden, and basement, in a variety of colors, including woodgrains, and other options.
